

Carbon Reduction Policy

A1R Services recognises the direct and harmful influence of carbon dioxide emissions on the climate. The company is committed to mitigating this impact and demonstrating good corporate citizenship by striving to improve energy efficiency and by doing so, to reduce its carbon dioxide emissions.

A1R Services has in place the following Carbon Reduction Policy that commits to:

- a) Reduction in the carbon emissions relating to its activities, products and services;
- b) Review and where appropriate establish carbon reduction objectives in line with our ISO 14001:2015 commitments;
- c) Elimination of carbon emissions, including prevention of pollution and specific carbon reduction commitments relevant to the context of the organization;
- d) Fulfil its compliance obligations with regards to carbon reduction emission targets and governmental commitments as appropriate to our organisation;
- e) Strive for continual improvement in carbon emission reductions

Responsibility for upholding this policy is truly Company-wide under the guidance and with the assistance of the Managing Director. This policy is communicated to all persons working for or on behalf of the company.

Signed*D G Parker*..... Managing Director
